

Common Symptoms of Transient Voltage

***Scrambled and Lost Data / Lightning Damage / Equipment Failure
Excessive Repair and Replacement Cost***

Down Time In All Areas!

IN OPERATIONS DO YOU EXPERIENCE:

- The necessity to re-boot or re-program software of PLC's
- Replacement of critical equipment boards?
- The need to replace T-8 lamps and electronic ballast too often?
- Security or fire alarm failures?
- Failed electronics of emergency generator equipment?
- Failed refrigeration and AC unit compressors and control power?
- Damaged variable frequency drives and unexplained behavior?
- Frequent motor rewinds?

IN ADMINISTRATION AREAS DO YOU EXPERIENCE:

- Telephone and data equipment failure after or during storms?
- Required reset of UPS system after use of electric floor buffer?
- Shortened life of UPS and less-than-stated battery life?
- The need to re-boot or re-program software of PC's?

But, Symptoms Don't Tell the Whole Story

.....Many problems arise gradually and symptoms appear only when the problems are advanced.

YOU CAN REDUCE DOWNTIME, REPAIR AND REPLACEMENT COST TODAY!
